CONTENTS OF VOLUME 10

Number 1, August 1972

S. Abarbanel and M. Goldberg. Numerical Solution of Quasi-Conservative Hyperbolic Systems–The Cylindrical Shock Problem 1
G. J. Burke, E. K. Miller, A. J. Poggio, G. M. Pjerrou, B. J. Maxum, and W. Meecham. An Integro-Differential Equation Approach to Acoustic Scattering from Fluid-Immersed Elastic Bodies 22
Richard Bellman, B. G. Kashef, and J. Casti. Differential Quadrature: A Technique for the Rapid Solution of Nonlinear Partial Differential Equations 40
E. R. Smith, R. S. Oberoi, and Ronald J. W. Henry. Application of the Harris–Nesbet Method to a Dipole Coupling Potential 53
Ralph Shapiro. Information Loss and Compensation in Linear Interpolation 65
H. Ralph Lewis, A. Sykes, and J. A. Wesson. A Comparison of Some Particle-in-Cell Plasma Simulation Methods 85
R. A. Brown and F. Lee. An Application of the Shooting Method to the Stability Problem for a Stratified, Rotating Boundary Layer 107
Donald G. Truhlar. Finite Difference Boundary Value Method for Solving One-Dimensional Eigenvalue Equations 123
David V. Anderson and John Killeen. Computation of Stable Equilibria in Minimum-B Mirror Devices 133
Herbert B. Keller and Tuncer Cebeci. An Inverse Problem in Boundary-Layer Flows: Numerical Determination of Pressure Gradient for a Given Wall Shear 151

Note

A. S. Dickinson. Determination of Accurate Potential Strengths to Yield Specified Eigenvalues of the Radial Schrödinger Equation 162

Announcement 167

Number 2, October 1972

Patrick J. Roache. On Artificial Viscosity 169
John R. Kirkpatrick and William F. Walker. Numerical Method for Describing Turbulent, Compressible, Subsonic Separated Jet Flows 185
Eugenia Kálnay de Rivas. On the Use of Nonuniform Grids in Finite-Difference Equations 202
Charlotte Froese Fischer. Iterative Solution of the Hartree–Fock Equations with Improved Stability 211
I. M. Longman. Numerical Laplace Transform Inversion of a Function Arising in Viscoelasticity 224
S. M. Roberts and J. S. Shipman. Solution of Troesch's Two-Point Boundary Value Problem by a Combination of Techniques 232
Edward L. Robinson, Jr. and Henry A. Scarton. CONTOR: A FORTRAN Subroutine to Plot Smooth Contours of a Single-Valued Arbitrary Three-Dimensional Surface 242
Charles S. Peskin. Flow Patterns Around Heart Valves: A Numerical Method 252
D. Shenker and R. Chen. Numerical Solution of the Glow Curve Differential Equations . 272

J. S. R. Chisholm, A. Genz, and Glenys E. Rowlands. Accelerated Convergence of Sequences of Quadrature Approximations 284
J. A. Campbell. Computation of a Class of Functions Useful in the Phase-Integral Approximation. I. Results 308
S. P. Singhal. Evaluation of Integrals over the Brillouin Zone by Houston's Method . . . 316
C. W. Hirt and J. L. Cook. Calculating Three-Dimensional Flows around Structures and over Rough Terrain 324
Ammon Aharony. A Computer Program for Molecular Dynamics of Dilute Gases 341
J. C. Cavendish, W. E. Culham and R. S. Varga. A Comparison of Crank-Nicolson and Chebyshev Rational Methods for Numerically Solving Linear Parabolic Equations . 354

Notes

K. Jurak, G. J. Pert, and C. E. Capjack. Least-Squares Solution for the Blunt Body Hypersonic Flow Problem 369
Paul Nelson, Jr. and C. A. Giles. A Useful Device for Certain Boundary-Value Problems 374

Number 3, December 1972

F. M. Galloway and R. J. Adler. On a Finite-Difference Approach to Turbulence Problems 379
H. Ralph Lewis. Variational Algorithms for Numerical Simulation of Collisionless Plasma with Point Particles Including Electromagnetic Interactions 400
W. D. Barfield. A Transformation of the Radiative Transfer Equation Useful for Problems with Steep Source Gradients 420
G. Gilat. Analysis of Methods for Calculating Spectral Properties in Solids 432
R. S. Oberoi, J. Callaway, and G. J. Seiler. Analytic Evaluation of Integrals in Variational Calculations of Scattering Theory 466
Hideo Okuda. Nonphysical Noises and Instabilities in Plasma Simulation due to a Spatial Grid 475
C. K. Forester and A. F. Emery. A Computational Method for Low Mach Number Unsteady Compressible Free Convective Flows 487
M. Petravic, G. Kuo-Petravic, and K. V. Roberts. Automatic Optimization of Symbolic Algol Programs. I. General Principles 503
H. Hembd and H. Kschwendt. Solution of the Transport Integral Equation with Anisotropic Scattering 534
Ching-Se Yen and Russell D. Larsen. Quasilinearization Technique for Solution of Unsteady State Diffusion Problems 554
J. L. Gammel and W. R. Wortman. Sixth-Order Effects in Nucleon–Nucleon Scattering . 568

Notes

W. L. Sadowski and D. W. Lozier. Use of Olver's Algorithm to Evaluate Certain Definite Integrals of Plasma Physics Involving Chebyshev Polynomials 607
Roger M. Nisbet. Acceleration of the Convergence in Nesbet's Algorithm for Eigenvalues and Eigenvectors of Large Matrices 614

Errata 620
